

**TECHNICAL DATA BULLETIN**

AR 250 Cleaner / Degreaser

Description:

A mildly alkaline cleaner used in metalworking plants and automotive remanufacturing as a spray cleaner for removing drawing and buffing compounds, stamping lubricants, cutting oils, or other fabricating soils from ferrous and non-ferrous materials. Due to its efficient cleaning effect on organic soils such as grease and oil, it can often replace many solvent cleaners and degreasers.

Properties:

appearance	clear liquid
odor	mild
specific gravity	1.2 – 1.25
maximum solubility	complete
rinsability	good
biodegradable	yes
normal working concentrations	1 - 10%
normal working temperatures	100 - 160° F

Application:

Fill tank with desired amount of water. Start heating water and add Sprakleen AR 250 while agitating. Exact amount of Sprakleen AR 250 to be used will depend on amount and type of soil. Consult with your representative for recommendations.

Packaging:

5 gallon pails  
55 gallon drums  
330 gallon tote tanks
