

TECHNICAL DATA BULLETIN

Sonic Cleaner 424

Description:

Sonic cleaner 424 is a chemical blend specifically designed for use in ultra-sonic equipment. The chemical composition of this product enhances cavitation in ultra-sonics creating a very active cleaner.

Properties:

chemical composition	wetting agents, dispersants, emulsifiers
appearance	blue liquid
odor	butyl odor
specific gravity	1.025
flash point	non-flammable
foaming tendency	slight
maximum solubility	complete
rinsability	excellent
biodegradable	yes
normal working concentrations	5%
normal working temperatures	ambient - 150°f
ph @ normal working concentrations	12.5

Uses:

Sonic cleaner 424 is an ozone-safe, biodegradable cleaner offering energy-efficient cleaning without compromising performance.

Sonic cleaner 424 was designed for use in a wide variety of applications. It replaces cfc-based products for vapor and metal degreasing, removes the toughest inks from print rollers, but is mild enough to clean eyeglass lenses.

Packaging:

4 x 1 gallon case
5 gallon pail
55 gallon drum
